Work Schedule for 2019

1. Go around and repair and clean up from all plow damage from winter season.
2. Check all roads for potholes and make all repairs.
3. Continue to keep the work order log up to date.
4. Crack seal all roads. This will be done in two (2) week increments. (This is going to be priority to prevent heaving and cracking this coming winter season.)
5. Work on tree trimming throughout the city. This will be done in one month increments due to the rental of the chipper.
6. Work on ditching throughout the city. This will be done as fast as the work orders come in or depending on project schedule.
7. Repair all sink holes and pot holes from the cold season.
8. Re-roof 3 buildings out back. Shingles are in rough shape and plywood is rotten and needs to be replaced.
9. Work on storm sewer projects throughout the city.
 - * Replace the crossover pipe on Dodd Rd between 2588 through 2592 replacing the existing 15" steel that is rotted out and install a new 36" HDPE pipe install a new catch basin and lower the crossover and eventually run to the cage.
 - * Replace storm sewer along Dodd road from 2556 through 2576 removing the existing 6" clay with 15" HDPE pipe to the cross over just west of 2566 Dodd road.
 - * Look at storm sewer along route 6 just east of Istra lane and figure out why it's not draining appears to have bad pipe unable to jet it.
10. Start asphalt patching on River road and maple grove road. Also any other streets that have centerline issues before striping starts.
