WORK ORDER LOG

This report contains our "Work Order Log" which identifies work orders that were called in to the Service Department for resolution. In 2019, there are 188 on the Work Order Log. These represent many resident calls, as well as calls for work needed on the City Hall and the Community Center grounds. I ensured that all the work orders were put on a spreadsheet for easy access in the event that the resident/City Hall worker can call back for a status. Sharen Michney in our Finance Dept. put it on a shared drive so that this log can be viewed in the Service Department, Building Department, Finance Department and the Mayor's office since the calls normally are handled by all of these Departments. This makes it nice for the resident being able to get a quick answer, rather than leaving messages or not getting back to them. Once the spreadsheet contained all of the work order sheets, I was able to review it and make sure that the work orders get scheduled and completed in a timely manner. This meant visiting many of the locations or following up with the residents. I believe the Work Order Log is now in great shape and is an excellent reference tool. It brings a true appreciation to the variety of issues and concerns that we handle on a daily basis.

Please let me know if you have any other questions when you read my report.

Thank you.

Mark Grubiss, Road Superintendent
