Subject: CEI Streetlight Tariff Update - LED Streetlight Replace on Failure
Attachments: LED Streetlight Customer Agreement Schedule C May 2020.pdf; OH STREET LIGHTING AGREEMENT - Cleveland Illuminating.pdf

Good Morning,

Recent updates to the CEI Streetlight Tariff approved by the PUCO allow the Illuminating Company (CEI) to convert existing streetlights to LED streetlights when they fail. A failed streetlight might be due to a light bulb burning out, a photocell malfunction or the entire luminaire not operating properly, or even a car pole accident. To take advantage of this opportunity, we simply need the two attached documents completed and returned as soon as possible.

In the **CEI LED Streetlight Agreement**, which is an agreement of understanding, please:

1. Complete page 1 in its entirety
2. Initial Option 3 on Page 2
3. Write in the municipality name on the Customer Line on the top of pages 2, 3, 4
4. Complete page 4.

In the **Schedule C** document, please:

1. Initial that the program begins July 6, 2020
2. Complete the Customer Information.

Once the documents are returned, you will receive a fully executed copy back to you for your records.

We plan to have CEI crews trained and appropriate LED streetlight inventory in place by July 6, 2020 to perform this work. So, please complete and return the forms as soon as possible. If you have any questions, please contact me.

Sincerely,

Wendy F. Zele
