

MAYOR'S REPORT FOR WEBSITE
MARCH 2012

Thanks to the Willoughby Hills Lions Club and the Willoughby Hills Recreation Commission for putting on three fine pancake breakfasts this year. Many residents and friends came out to enjoy the delicious cuisine and it was a sure sign that we are nearing the end of winter.

Spring projects will include replacement of the Maple Grove bridge over I-90 and repair of the slope on Rogers Road. Both projects will require some road closure for a period of time, but we are trying to keep this to a minimum for the convenience of motorists. We are anxious, however, to get these necessary repairs done to make travelling through the city of Willoughby Hills safer. Your patience is appreciated as we embark on these two construction projects very soon.

Resumes for the position of Economic Development Director are currently being reviewed. We hope to have a new employee in place as soon as possible to focus on the improvement of the economic climate of our community. Thanks to all those residents who completed the "Economic Development Survey" in the recent newsletter. Your input is appreciated. It is not too late to get your survey in...please mail it in or drop it off at City Hall at your earliest convenience. We welcome your ideas!

In closing, our Service Department will continue to pave this year, as well as repair potholes that have developed over the winter. Any concerns about a specific area should be directed to our Service Department at 440-918-8740. Remember to follow the progress of our projects and all other upcoming news on our website at www.willoughbyhills-oh.gov.
