

Proper/Safe Equipment Cleaning

In the wake of the Coronavirus pandemic, it is strongly recommended to sanitize high traffic areas on your office equipment. Please follow these tips from our trusted partners:

Chemicals safe to use:

- Isopropyl alcohol wipes
- Most antibacterial/disinfectant wipes
- Most antibacterial/disinfectant sprays*

*For sprays:

- Use a soft, lint free cloth. Moisten it with spray and wipe down the screen and panels
- **Do not:** Spray directly onto device (this can damage internal components) or use paper towels (they may scratch screens)

Avoid the below chemicals, as these can damage or cloud the screens:

- Bleach
- Ammonia
- Other harsh cleaning solvents

Should you have any questions, please feel free to contact us at sales@lakebusiness.com or 1-800-443-4583
